

Pool Draining Reminder

Ready to do some work on your pool? Before you start pumping the water out of your pool, you should be aware that you cannot drain your pool into the street or the Common Areas, lakes or golf courses. See ALC Guidelines Section 27.F, page 25.

Also, for Homeowners in Unit 33, the City of Chandler provides complete draining information at www.chandlereraz.gov.

No permit is needed prior to draining your pool; however the water is required to be maintained on your property or into the sewer clean-out on your property. The sewer clean-out is typically a three or four-inch black plastic pipe about level with the landscaping, typically located in the front yard close to the home. During general maintenance, when backwashing your pool, drainage into the sewer clean-out is not necessary as long as the discharge is maintained on your property.

Thank You,
Ron Kotnik
