

WALKERS TAKE HEED

Last week we had several near-accidents between motor vehicles and walkers. The reason for this was that the walkers were walking *with traffic!* It is virtually impossible to see the walkers, especially if there are several vehicles traveling at the same time. Another important factor is they were not carrying any kind of light.

Always walk facing traffic. If walking at night, please carry a flashlight or wear reflective clothing so that you will be seen. Enjoy your walk, but be safe.
